

AUGUST REVIEW

Do you have tons of buckets laying around but can't seem to find the tops? I know I do. From supplement buckets that I have emptied and for some reason, the tops disappear. There is a leak proof, water-proof lid, called the Gamma Lid, that fits right on the bucket, fits tightly and has a screw top that lifts off very easily. Most feed supply houses have it, but if not, you can get it online at www.sportack.com

For those of you that do a lot of hauling to different trail rides, you may find that a collapsible water bucket would come in handy. I use it at my barn to haul water or food to stalls if necessary or anywhere else. Once it is emptied, just fold it and put it up. Extremely convenient and it is one of those things that once you have it, you always need it! www.sportack.com also has these, but most tack shops carry them or can order it for you.
