

SEPTEMBER 2004 REVIEW

Summer is almost over, THANK GOODNESS! Soon no more bugs, so it is time to get those last few baths in. I found a neat new washing tool.....The Squeazy Clean, the fanning jet washes away dirt and grime. Just attach to your hose and rinse. All clean, just scrape water off and you are finished....there is a flexible squeegee to sweep water away as well as a water sleeve to protect you from dripping and spraying water. It is so fast and easy! Only 14.95 and Wind Rider and Tack... www.windridertack.com

Halter/bridle combos! I know most of you have heard of these, but there is one that I have used that is so easy to use and is made of Zilco, like biothane, but feels more like leather. Just dump it in a bucket of water and presto, it is like new. I got mine from www.windridertack.com Not only is it made of zilco, but the halter bridle combo allows you to have a halter with you on trail rides, incase you want to stop and tie your horse up to a tree, just take the bit straps off and voila! Your halter is already on, ready and waiting! Believe me, these last forever, do NOT mildew, stretch, rot, get hard in cold weather, get stained or tear. I have some that are 6 years old and look new....except for the brass hardware, you would never know they were that old.
