

JANUARY 2006 REVIEW

Easy soaker boots

After just having gone through an abscess with one of my horses, I was looking for a way to keep her foot soaked and pliable so it could come out easier and quicker.

I tried soaking 3-4 times a day and tried many other soak boots. The best one was the Easy Soaker for various reasons.

It stayed on well, kept water/Epsom salt inside and she has no problems walking with it. I even turned her out overnight in them (that is not recommended, but I tried it to see how they would wear). It kept her hoof clean and kept the meds where I wanted it. There was no rubbing nor any sore spots after it was taken off. It was easy on, easy off! If you need to correct heel/toe position due to an injury or abscess site, with padding, this would be very easy with this boot.

It also allowed me to pad her foot so there was less concussion, keeping the padding in the right spot without having to wrap twice a day. I saved SO much time!

It is called the Easy Soaker, comes in sizes 0-2 and seem to last a long time. I only used them for about 2 months, but they don't show any real wear. They are very easy to clean out, hose and let dry.

One of the best ways I have found to soak and treat any hoof issue.
