

MARCH REVIEW

Well, we made it through the winter only to find spring, bugs and ticks! ICK. I normally make my own fly spray, but I have found one that works about as well as anything out there. It is [Eqyss Summer Defense Marigold Spray](#).

It smells good and seems to stay on through a long ride. It is non toxic and does not stain. Marigolds have been used for years to keep bugs out of a garden and this does work extremely well! Also has a UV sunscreen.

For going on those trail rides and hauling away from home, I found a Bucket Buddy that fits on your bucket and holds all the necessary items you would take with you. It is 2 panels that fit around the bucket 12" x 8" x 2" folded. You can get these on Don West's website, www.havesaddlewilltravel.com

Also, on this same website are things that everyone needs to have "just in case"! They are called Cheer-Y-Os and they are Velcro straps that will hold just about anything. You can put them on your saddle D rings to hold water bottles, or anything else you want to secure. Very useful to have around!
